SEEMA ALMAS YUNUS SHAIKH

Full Stack Developer | ReactJS, NodeJS | Passionate About AI, Blockchain, DevOps

Dedicated and results-oriented Software Developer with 11 years of experience specializing in ReactJS, JavaScript, Redux, HTML, CSS, and SCSS, NodeJS. Skilled at building scalable, high-performance web applications with a strong focus on user experience, responsive design, and code quality. Experienced in leading and mentoring development teams, ensuring successful project delivery through collaboration and strategic planning. Currently enhancing backend and cross-platform development skills with Python and Flutter. Committed to continuous learning, innovation, and contributing to impactful, growth-driven projects.

PROFESSIONAL SUMMARY

- Full Stack Developer with 11 years of hands-on experience in front-end and back-end development, specializing in ReactJS, JavaScript, Redux, HTML5, CSS, SCSS, NodeJS, and basic MongoDB.
- Proven leadership in managing, mentoring, and guiding development teams towards successful project completion, maintaining a strong track record of zero-defect deliveries.
- Expertise in designing scalable, user-centric, and high-performance web applications, with a deep focus on responsive UI development and seamless UX integration.
- Strong skills in backend API creation, authentication, and authorization using NodeJS, and a foundational understanding of database operations with MongoDB.
- Actively upskilling in Python and Flutter to expand backend and cross-platform mobile development capabilities, along with continuous exploration of AI, Blockchain, and DevOps technologies.
- Adept at critical thinking, strategic problem-solving under pressure, and delivering high-quality solutions within fast-paced Agile environments.
- Skilled in Agile practices including sprint planning, backlog refinement, task tracking, and collaboration using Jira and Azure DevOps.
- Experienced in building and managing CI/CD pipelines, source control management with Git, enforcing best practices through rigorous code reviews and comprehensive test case writing.
- Proficient in collaborating with UX teams to enhance user experiences, developing reusable component libraries, and leading cross-functional initiatives for delivery excellence.
- Hands-on experience in providing production release support and post-deployment maintenance to ensure stability, performance, and client satisfaction.
- Committed to innovation, continuous improvement, and contributing to a positive, growth-oriented team culture.

WORK EXPERIENCE

Assistant Vice President
Citi Corp (Pune, India) *(Dec 2022 - Present)*

As an Assistant Vice President, provided strategic leadership and direction to the UI development team, ensuring delivery excellence, innovation, and alignment with business objectives. Spearheaded initiatives to optimize front-end architecture, enhance user experience, and foster a high-performing team environment.

- Led full cycle requirement gathering and analysis to align frontend architecture and user experience with business objectives, ensuring delivery of intuitive and high performing applications.
- Architected and implemented scalable web solutions using ReactJS, Redux, JavaScript, HTML/CSS, and NodeJS, improving performance and code maintainability across multiple projects.
- Guided cross functional teams through complex development lifecycles, actively mentoring developers and fostering a culture of technical excellence, collaboration, and continuous improvement.
- Introduced reusable UI components and shared utilities, resulting in a 50% reduction in development time and improved code standardization across teams.
- Developed and maintained backend services using NodeJS and integrated with MongoDB, contributing to seamless API performance and system scalability.
- Enhanced test coverage through unit and integration testing, resulting in fewer bugs in production and streamlined QA cycles.
- Practiced Agile methodologies including sprint planning, backlog grooming, and retrospectives, contributing to a 25% increase in delivery efficiency.
- Collaborated closely with architects, product managers, and QA teams to deliver highimpact features aligned with strategic product goals.
- Drove code optimization and refactoring, consolidating redundant logic and constants into centralized modules, enhancing maintainability.
- Exploring and integrating CI/CD best practices, contributing to improved deployment reliability and reduced manual effort.
- Hindson experience with Flutter and basic Python, expanding versatility in mobile and scripting tasks as needed.

Achievements:
- Successfully delivered multiple high-visibility projects with a strong focus on cutting-edge UI design and enhanced user experience.
- Recognized by leadership for fostering an innovative and adaptive team environment, leading to increased project velocity and quality.

Senior Technology Consultant
Ernst & Young (Pune, Maharashtra) *(Oct 2021 - Nov 2022)*

Managed and mentored a team of developers, steering projects towards strategic goals and ensuring the consistent delivery of high-quality, scalable software solutions. Focused on driving innovation, improving development processes, and fostering a collaborative team environment.

- Directed critical project initiatives to minimize defects, stabilize product outcomes, and enhance overall delivery quality.
- Innovated and developed a key API component to streamline developer experience and accelerate integration timelines.
- Successfully led a zero-defect UI project from conception to full client satisfaction and deployment.
- Authored detailed documentation to support new feature rollouts, knowledge sharing, and team training efforts.
- Facilitated seamless team collaboration to achieve and exceed set sprint goals and delivery milestones.
- Played a pivotal role in customer issue resolution and critical problem-solving during development and post-launch phases.
- Actively engaged across the entire Software Development Life Cycle (SDLC) including requirement gathering, design, development, testing, and deployment.

Achievements:

- Delivered critical UI projects with zero defects, significantly boosting client confidence and project success rate.
- Enhanced overall team efficiency, collaboration, and innovation through effective leadership and proactive mentoring.
- Recognized for driving process improvements and contributing to the continuous enhancement of project outcomes.

Senior Software Engineer
One Network Enterprises (Pune, Maharashtra) *(Sep 2020 - Sep 2021)*

Acted as a key contributor and collaborator in the software development team, focusing on optimizing user interfaces (UI) and enhancing user experiences (UX) for diverse client projects, with a particular emphasis on supply chain management solutions.

- Collaborated with cross-functional teams to deliver UI solutions tailored for supply chain management systems.
- Incorporated UX principles to design intuitive, user-friendly interfaces meeting client-specific needs.
- Applied supply chain management domain knowledge to UI development for optimized user flows.
- Built and maintained strong working relationships with clients, stakeholders, and internal teams.
- Contributed actively to defining project specifications and ensuring alignment with customer requirements.
- Supported project delivery through thorough documentation, client feedback sessions, and agile sprint cycles.

Achievements:

- Successfully delivered optimized, high-performance UI solutions within stringent timelines, ensuring high client satisfaction.
- Consistently recognized for maintaining excellent client relations and fostering a collaborative environment throughout project lifecycles.
- Appreciated for translating complex domain requirements into simple, elegant front-end solutions.

Lead UI Developer
Infosys Limited (Pune) *(Aug 2017 - Aug 2020)*

Led and guided a team of UI developers, ensuring project alignment with user requirements, technical standards, and organizational goals. Focused on delivering high-quality, scalable UI solutions through effective project planning, mentoring, and cross-team collaboration.

- Spearheaded UI development for the Speedboat project, managing requirements analysis, design, and enhancement implementations.
- Authored detailed high-level design documents and defined effective API integration strategies.
- Developed robust data models in LoopbackJS to ensure strong database relations and efficient backend connectivity.
- Mentored a team of 9 developers, fostering skill development, best practices adoption, and overseeing high standards of code quality.
- Designed and implemented a custom Gulp utility to automate file system tasks, boosting team productivity and reducing manual overhead.
- Actively collaborated with cross-functional teams to ensure project success across all stages of the Software Development Life Cycle (SDLC).

Achievements:

- Successfully led the Speedboat project to meet and exceed high standards of UI design, functionality, and client satisfaction.
- Received formal recognition for exceptional leadership, mentoring capabilities, and team performance improvement.

Associate Software Engineer
The Digital Group Infotech Pvt. Ltd (Pune) *(Apr 2014 - Jul 2017)*

Functioned as a Full Stack Developer, playing a significant role in both front-end and back-end development processes, system enhancements, and user experience optimization.

- Enhanced system functionality through full-stack development and performance analysis.
- Conducted module-level testing and code optimization to improve application performance and reliability.
- Designed and implemented the application's homepage, enhancing user experience and navigation flow.
- Developed custom AngularJS directives and implemented a date picker feature for dynamic user interaction.
- Leveraged Google Charts in AngularJS for insightful and dynamic data visualization solutions.
- Actively participated in design discussions, development cycles, and module integration for project delivery.

Achievements:

- Successfully improved overall system functionality and user experience through innovative front-end and back-end development strategies.
- Recognized for contributing to effective testing, performance tuning, and system optimization initiatives that enhanced application stability.

EDUCATION

B.E: Computer Science and Engineering (2008-07 - 2012-07)
Babasaheb Naik college of engineering Pusad, Amravati University, Maharashtra

LANGUAGES

English, Hindi, Marathi

CERTIFICATIONS

- **Azure AZ900**
  (
  Microsoft
  - 2022)

ACHIEVEMENTS

- Consistently achieved near-perfect on-time delivery for assigned modules, significantly reducing defects, enhancing client satisfaction, and contributing to improved project KPIs.
- Launched and successfully led the innovative SpeedBoat project, earning recognition for its user-centric design approach, seamless execution, and efficient project management practices.

SKILLS

Technical Skills: JavaScript Python ReactJS Redux Html5 CSS Flutter

Soft Skills: Communication, Teamwork, Leadership, Problem-solving

HOBBIES

Exploring emerging technologies like AI, Blockchain, and DevOps through online communities and self-projects,
Writing technical blogs and tutorials to share knowledge and contribute to the developer community,
Engaging in fitness activities like running and yoga to maintain focus and a healthy work-life balance,
Volunteering for tech mentorship programs and coding workshops for young learners
